Miratel® Innova

Secure Life with Technology

Miratel® Innova IP Nurse Call System

Scalable from nursing homes to hospitals

Miratel® Innova is a flexible and reliable solution for all kind of nurse call needs. Innova software provides an easy-to-use interface for everyday nursing activities between patients and nurses. The software together with intelligent, self-monitoring wireless or wired Innova devices creates a secure and powerful communication environment for nursing homes and hospitals.

Communication

Advanced Miratel® Innova wireless and wired devices with positioning features build up reliable nurse call systems. Speech connection, patient telephones and wanderer control strengthen the advantages of Innova. Miratel® Innova software's visual environment displays alarms on configurable maps. Innova supports teams and alarms can be directed to specific teams. Innova uses open cabling and existing data cabling can be utilized.

Reliable Services

Flexible Miratel® Innova is a perfect platform for various nursing services. Remote home nurse call services are fast and reliable to establish because Innova can securely use public Internet networks or wireless networks.

Existing care phones and surveillance systems can be connected to Innova environment.

Manage and Report

Miratel® Innova reports are generated from everyday activities. Reports include necessary information about patient calls but also vital information about operations and response times.

Reports are based on automatically generated activity logs. Logs provide secure and traceable method to fulfill the need of operational reports.

Innova Media Services

Miratel® Innova Streaming Services open totally new experiences for patients. Intelligent Innova network and devices provide video and audio programs, Internet browsing and games. In addition, webcams can be connected to Innova devices and patients can access their personal e-mail accounts. Service providers get great advantage in competitive business with Innova Streaming Services.

Miratel® Provides Strong Support for Dealers and Resellers

Sales Support

Miratel® helps resellers to complete the sales and deployment of Innova systems. Intensive training packages make resellers Innova experts and boost the resellers' capabilities to successfully complete sales projects.

Miratel® ready-to-use sales material packages give resellers the extra edge to ensure targeted customers about the benefits Miratel® Innova can provide.

Setup and Deployment

Miratel® Innova Configurator software gives unique advantages for resellers in both Innova system setup and system deployment. Configurator also helps the resellers to save each customers site configuration with version control. Additionally, Miratel® Innova can be sold as an ASP-service.

Customer Care

Miratel® Innova Customer Care offers support for every aspect considering Innova systems. Trained and Certified Miratel® personnel help customers by keeping their valuable Innova systems up and running.

Innova Remote Management, based on industry standard software, creates unique possibilities to securely manage each customers' system. Remotely run system and software updates minimize customers' efforts.

Unique Miratel® Innova Advantages

Innova uses standard open network cabling, no dedicated cabling is required.

Innova is based on standard IP-technology.

Innova is a self-monitoring system with automatic technical alarms.

Wireless technology makes Innova a cost-effective solution when upgrading existing and operational systems.

Wireless LAN (WLAN) and GSM-technology makes Innova fast to setup even in crisis areas.

Standards compliant connectivity, such as HL-7 support, combines and maximizes the benefits of legacy systems and Miratel® Innova.

Miratel® Innova effectively supports previous Miratel® systems and devices.

Support for common Microsoft® server technologies ensure expandability in the future.

Common network active devices and standard cabling can be used for connecting Innova devices. Power to devices can be supplied via the same cabling.
